# Energy performance certificate (EPC) Tattenham Corner Derby Road POULTON-LE-FYLDE FY6 7AF Detached house Total floor area Total floor area Energy rating Valid until: 10 May 2033 Certificate number: 6503-2497-8002-1005-3602

# Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance</u> for <u>landlords</u> on the <u>regulations</u> and <u>exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

# Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

| Feature              | Description                                 | Rating  |
|----------------------|---|---------|
| Wall                 | Cavity wall, as built, insulated (assumed)  | Good    |
| Wall                 | Timber frame, as built, insulated (assumed) | Good    |
| Roof                 | Pitched, 75 mm loft insulation              | Average |
| Roof                 | Pitched, insulated (assumed)                | Average |
| Roof                 | Roof room(s), insulated (assumed)           | Good    |
| Window               | Fully double glazed                         | Average |
| Main heating         | Boiler and radiators, mains gas             | Good    |
| Main heating control | Programmer, room thermostat and TRVs        | Good    |
| Hot water            | From main system                            | Good    |
| Lighting             | Low energy lighting in 58% of fixed outlets | Good    |
| Floor                | Solid, no insulation (assumed)              | N/A     |
| Floor                | To unheated space, no insulation (assumed)  | N/A     |
| Secondary heating    | Room heaters, mains gas                     | N/A     |

### Primary energy use

The primary energy use for this property per year is 219 kilowatt hours per square metre (kWh/m2).

# **Environmental impact of this property**

This property's current environmental impact rating is D. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.

An average household 6 tonnes of CO2 produces

This property produces 6.7 tonnes of CO2

This property's potential 5.1 tonnes of CO2 production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

# Improve this property's energy rating

| Step                                  | Typical installation cost | Typical yearly saving |
|---------------------------------------|---------------------------|-----------------------|
| 1. Increase loft insulation to 270 mm | £100 - £350               | £102                  |
| 2. Floor insulation (solid floor)     | £4,000 - £6,000           | £158                  |
| 3. Low energy lighting                | £70                       | £72                   |
| 4. Solar photovoltaic panels          | £3,500 - £5,500           | £661                  |

### Paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

# Estimated energy use and potential savings

Based on average energy costs when this EPC was created:

| Estimated yearly energy cost for this property       | £3264 |
|--|-------|
| Potential saving if you complete every step in order | £332  |

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

### Heating use in this property

Heating a property usually makes up the majority of energy costs.

# Estimated energy used to heat this property

Space heating 19789 kWh per year

Water heating 3542 kWh per year

Potential energy savings by installing insulation

Type of insulation Amount of energy saved

**Loft insulation** 1185 kWh per year

## Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.

### Assessor contact details
