Energy performance certificate (EPC)

Flat 26 Energy rating Valid until: 5 April 203 Northway Court C Certificate 9402-1072 Green Avenue NW7 4PY PY PHONE	32 2-5202-0004-0402
---	------------------------

roperty type

Ground-floor flat

otal floor area

65 square metres

les on letting this property

operties can be rented if they have an energy rating from A to E.

he property is rated F or G, it cannot be let, unless an exemption has been registered. You can read guidance for landlords of regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standarddlord-guidance).

nergy efficiency rating for this property

is property's current energy rating is C. It has the potential to be C.

e how to improve this property's energy performance.

Score	Energy rating	Current	Potential
)2+	Α		
31-91	B		
)9-80	С	71 I C	78 C
5-68	D		
89-54	E		
21-38	F		
-20		G	

e graph shows this property's current and potential energy efficiency.

pperties are given a rating from A (most efficient) to G (least efficient).

operties are also given a score. The higher the number the lower your fuel bills are likely to be.

r properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

eakdown of property's energy performance

is section shows the energy performance for features of this property. The assessment does not consider the condition of a ature and how well it is working.

ch feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

nen the description says "assumed", it means that the feature could not be inspected and an assumption has been made sed on the property's age and type.

ature	Description	Rating
all	Solid brick, as built, no insulation (assumed)	Very poor
ndow	Fully double glazed	Average
ain heating	Boiler and radiators, mains gas	Good
ain heating control	Programmer, TRVs and bypass	Average
it water	From main system	Good
Ihting	Low energy lighting in all fixed outlets	Very good
of	(another dwelling above)	N/A
or	Solid, no insulation (assumed)	N/A
condary heating	None	N/A

rimary energy use

e primary energy use for this property per year is 204 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

vironmental impact of this property

is property's current environmental impact rating is C. It has the potential to be C.

pperties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.

operties with an A rating produce less CO2 than G rated properties.

n average household 6 tonn roduces

his property produces

his property's potential roduction

making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 0.7 tonnes per year. This will help to stect the environment.

6 tonnes of CO2

2.3 tonnes of CO2

1.6 tonnes of CO2

vironmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how ergy is consumed by the people living at the property.

76 I C

prove this property's energy performance

/pical yearly saving	£95
/pical installation cost	£4,000 - £14,000
ernal or external wall insulation	
tep 1: Internal or external wall insulation	
Do I need to follow these steps in order?	
rrying out these changes in order will improve the property's energy rating and score from C (71) C (78).	rating
following our step by step recommendations you could reduce this property's energy use and tentially save money.	Potential energy

otential rating after completing step

tep 2: Floor insulation (solid floor)

por insulation (solid floor)

pical installation cost	£4,000 - £6,000
/pical yearly saving	£41

stimated energy use and potential savings

stimated yearly energy cost for this

roperty

otential saving

e estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It t based on how energy is used by the people living at the property.

e potential saving shows how much money you could save if you complete each recommended step in order.

r advice on how to reduce your energy bills visit Simple Energy Advice (https://www.simpleenergyadvice.org.uk/).

leating use in this property

ating a property usually makes up the majority of energy costs.

stimated energy used to heat this property

pe of heating	Estimated energy used	
ace heating	6208 kWh per year	
ater heating	2070 kWh per year	
otential energy savings by installing insulation		
pe of insulation	Amount of energy saved	
lid wall insulation	2175 kWh per year	

ontacting the assessor and accreditation scheme

is EPC was created by a qualified energy assessor.

rou are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

ou are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

creditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
