Energy performance certificate (EPC)

32, Ramillies Road LONDON NW7 4LX

Energy rating

D

Valid until: 21 August 2027

Certificate number:

8806-8515-3329-7897-8833

roperty type

Semi-detached house

otal floor area

87 square metres

iles on letting this property

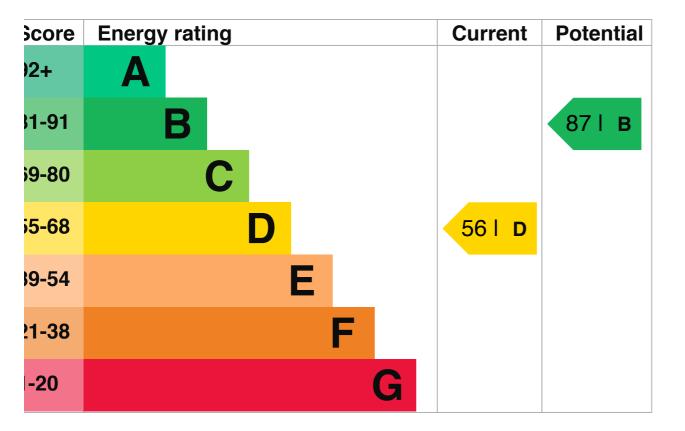

operties can be rented if they have an energy rating from A to E.

he property is rated F or G, it cannot be let, unless an exemption has been registered. You can read <u>guidance for landlords of regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-dlord-guidance).</u>

nergy efficiency rating for this property

is property's current energy rating is D. It has the potential to be B.

e how to improve this property's energy performance.

e graph shows this property's current and potential energy efficiency.

operties are given a rating from A (most efficient) to G (least efficient).

operties are also given a score. The higher the number the lower your fuel bills are likely to be.

r properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

eakdown of property's energy performance

is section shows the energy performance for features of this property. The assessment does not consider the condition of a sture and how well it is working.

ch feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

nen the description says "assumed", it means that the feature could not be inspected and an assumption has been made sed on the property's age and type.

ature	Description	Rating
الد	Cavity wall, as built, partial insulation (assumed)	Average
of	Pitched, 25 mm loft insulation	Poor
ndow	Fully double glazed	Average
ain heating	Boiler and radiators, mains gas	Good
ain heating control	Programmer, no room thermostat	Very poor
t water	From main system	Good
ıhting	Low energy lighting in 43% of fixed outlets	Average
or	Suspended, no insulation (assumed)	N/A
condary heating	None	N/A

rimary energy use

e primary energy use for this property per year is 319 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

dditional information

ditional information about this property:

· Cavity fill is recommended

nvironmental impact of this property

is property's current environmental impact rating is E. It has the potential to be B.

operties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.

operties with an A rating produce less CO2 than G rated properties.

n average household roduces	6 tonnes of CO2
his property produces	4.9 tonnes of CO2
his property's potential roduction	1.2 tonnes of CO2

making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 3.7 tonnes per year. This will help to steet the environment.

vironmental impact ratings are based on assumptions about a ergy is consumed by the people living at the property.	verage occupancy and energy use.	They may not reflect how

prove this property's energy performance

following our step by step recommendations you could reduce this property's energy use and tentially save money.

rrying out these changes in order will improve the property's energy rating and score from D (56) B (87).

Do I need to follow these steps in order?

Potential energy rating

tep 1: Increase loft insulation to 270 mm

rease loft insulation to 270 mm

pical installation cost	£100 - £350
pical yearly saving	£102
otential rating after completing step	60 I D

tep 2: Cavity wall insulation

vity wall insulation

pical installation cost	£500 - £1,500
pical yearly saving	£115
otential rating after completing steps and 2	65 I D

tep 3: Floor insulation (suspended floor)

or insulation (suspended floor)

pical installation cost	£800 - £1,200
pical yearly saving	£58
otential rating after completing steps to 3	67 I D

tep 4: Draught proofing

aught proofing

pical installation cost	£80 - £120
pical yearly saving	£37
otential rating after completing steps to 4	68 I D

tep 5: Low energy lighting

w energy lighting

pical installation cost	£20
/pical yearly saving	£29
otential rating after completing steps to 5	70 I C

tep 6: Heating controls (room thermostat and TRVs)

ating controls (room thermostat and TRVs)

pical installation cost	£350 - £450
/pical yearly saving	£86
otential rating after completing steps to 6	73 I C

tep 7: Replace boiler with new condensing boiler

ndensing boiler

pical installation cost	£2,200 - £3,000
pical yearly saving	£76
otential rating after completing steps	

tep 8: Solar water heating

lar water heating

pical installation cost	£4,000 - £6,000
/pical yearly saving	£34
otential rating after completing steps to 8	77 I C

tep 9: Solar photovoltaic panels, 2.5 kWp

lar photovoltaic panels

pical installation cost	£5,000 - £8,000
pical yearly saving	£283
otential rating after completing steps to 9	87 I B

aying for energy improvements

<u>id energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)</u>

stimated energy use and potential savings

stimated yearly energy cost for this roperty	£1064
otential saving	£537

e estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It t based on how energy is used by the people living at the property.

e potential saving shows how much money you could save if you complete each recommended step in order.

leating use in this property

ating a property usually makes up the majority of energy costs.

stimated energy used to heat this property

pe of heating Estimated energy used

ace heating 12240 kWh per year

ater heating 2167 kWh per year

otential energy savings by installing insulation

pe of insulation Amount of energy saved

ft insulation 1722 kWh per year

vity wall insulation 1941 kWh per year

ontacting the assessor and accreditation scheme

is EPC was created by a qualified energy assessor.

vou are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

rou are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

creditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
