Energy performance certificate (EPC)				
58 Bentmeadows ROCHDALE	Energy rating	Valid until: 5 July 2033		
OL12 6HZ	D	Certificate number: 0080-2536-8332-2607-1081		
Property type	end-terrace house			
Total floor area		39 square metres		

Rules on letting this property

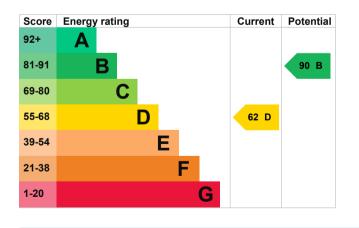

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for landlords on the regulations and exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

Energy rating and score

This property's current energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating	
Wall	Solid brick, as built, no insulation (assumed)	Poor	
Roof	Pitched, 75 mm loft insulation	Average	
Window	Fully double glazed	Average	
Main heating	Boiler and radiators, mains gas	Good	
Main heating control	Programmer, no room thermostat	Very poor	
Hot water	From main system	Good	
Lighting	Low energy lighting in all fixed outlets	Very good	
Floor	Solid, no insulation (assumed)	N/A	
Secondary heating	None	N/A	

Primary energy use

The primary energy use for this property per year is 410 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend £1,429 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £551 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 8,688 kWh per year for heating
- 1,705 kWh per year for hot water

Impact on the environment		2.8 tonnes of CO2	
This property's current environmental impact rating is D. It has the potential to be A.		0.8 tonnes of CO2	
Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.		You could improve this property's CO2 emissions by making the suggested changes.	
	This will help to protect the	environment.	
6 tonnes of CO2	These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.		
	onmental impact al to be A. Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Internal or external wall insulation	£4,000 - £14,000	£311
2. Floor insulation (solid floor)	£4,000 - £6,000	£79
3. Heating controls (room thermostat and TRVs)	£350 - £450	£105
4. Solar water heating	£4,000 - £6,000	£55
5. Solar photovoltaic panels	£3,500 - £5,500	£579

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.
