

# Energy performance certificate (EPC)

4, Ernest Street  
TODMORDEN  
OL14 8JS

Energy rating

**E**

Valid until: **1 December 2026**

Certificate number: **9547-2880-7696-9396-5865**

## Property type

Mid-terrace house

## Total floor area

84 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy rating and score

This property's current energy rating is E. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

### Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Roof	Pitched, no insulation (assumed)	Very poor
Roof	Roof room(s), no insulation (assumed)	Very poor
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system	Good

Feature	Description	Rating
Lighting	No low energy lighting	Very poor
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	None	N/A

## Primary energy use

The primary energy use for this property per year is 466 kilowatt hours per square metre (kWh/m<sup>2</sup>).

▶ [About primary energy use](#)

## Additional information

Additional information about this property:

- Stone walls present, not insulated
- Dwelling may be exposed to wind-driven rain

### How this affects your energy bills

An average household would need to spend **£1,514 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £709 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2016** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 20,448 kWh per year for heating
- 2,146 kWh per year for hot water

### Impact on the environment

This property's current environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year. CO<sub>2</sub> harms the environment.

## Carbon emissions

### An average household produces

6 tonnes of CO<sub>2</sub>

### This property produces

6.9 tonnes of CO2

---

**This property's potential production**

2.6 tonnes of CO2

---

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Changes you could make

► [Do I need to follow these steps in order?](#)

---

### Step 1: Room-in-roof insulation

Typical installation cost

£1,500 - £2,700

Typical yearly saving

£351

Potential rating after completing step 1

**61 D**

---

### Step 2: Internal or external wall insulation

Typical installation cost

£4,000 - £14,000

Typical yearly saving

£161

Potential rating after completing steps 1 and 2

**66 D**

---

### Step 3: Low energy lighting

Typical installation cost

£40

Typical yearly saving

£46

Potential rating after completing steps 1 to 3

**68 D**

## Step 4: Heating controls (room thermostat)

Typical installation cost

£350 - £450

---

Typical yearly saving

£46

---

Potential rating after completing steps 1 to 4

69 C

---

## Step 5: Replace boiler with new condensing boiler

Typical installation cost

£2,200 - £3,000

---

Typical yearly saving

£77

---

Potential rating after completing steps 1 to 5

71 C

---

## Step 6: Flue gas heat recovery device in conjunction with boiler

Typical installation cost

£400 - £900

---

Typical yearly saving

£29

---

Potential rating after completing steps 1 to 6

72 C

---

## Step 7: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

---

## Typical yearly saving

£245

---

## Potential rating after completing steps 1 to 7

83 B

---

## Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

### Who to contact about this certificate

## Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

### Assessor's name

Lee Pritchard

---

### Telephone

01772 830 323

---

### Email

[lee@uk-psn.co.uk](mailto:lee@uk-psn.co.uk)

---

## Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

### Accreditation scheme

Stroma Certification Ltd

---
