Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

| | |
|---|-------------------|
| An average household produces | 6 tonnes of CO2 |
| This property produces | 4.8 tonnes of CO2 |
| This property's potential production | 1.2 tonnes of CO2 |
