# **Energy performance certificate (EPC)**

74 square metres

# Rules on letting this property

Properties can be let if they have an energy rating from A to E.

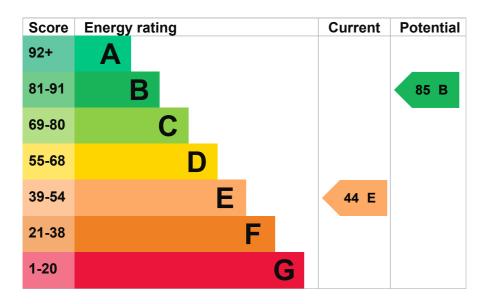

**Total floor area** 

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

# **Energy rating and score**

This property's energy rating is E. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- · the average energy rating is D
- the average energy score is 60

# Breakdown of property's energy performance

#### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Pitched, 200 mm loft insulation	Good
Window	Full secondary glazing	Good
Main heating	Boiler and radiators, B30K	Poor
Main heating control	Programmer and room thermostat	Average
Hot water	From main system	Poor
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, wood logs	N/A

#### Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

· Biomass secondary heating

#### Primary energy use

The primary energy use for this property per year is 280 kilowatt hours per square metre (kWh/m2).

About primary energy use

# How this affects your energy bills

An average household would need to spend £1,590 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £811 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

# **Heating this property**

Estimated energy needed in this property is:

- 10,025 kWh per year for heating
- 2,396 kWh per year for hot water

# Impact on the environment

This property's environmental impact rating is E. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### Carbon emissions

# An average household produces 6 tonnes of CO2 This property produces 3.9 tonnes of CO2 This property's potential production 0.8 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Changes you could make

▶ Do I need to follow these steps in order?

Step 1: Inter	nal or external	wall insulation
---------------	-----------------	-----------------

Typical installation cost	£4,000 - £14,000
Typical yearly saving	£494
Potential rating after completing step 1	61 D

## **Step 2: Floor insulation (suspended floor)**

Typical installation cost	£800 - £1,200
Typical yearly saving	£106
Potential rating after completing steps 1 and 2	65 D

## **Step 3: Heating controls (thermostatic radiator valves)**

Heating controls (TRVs)

Typical installation cost	£350 - £450
Typical yearly saving	£37
Potential rating after completing steps 1 to 3	66 D

## Step 4: Replace boiler with new condensing boiler

Typical installation cost	£2,200 - £3,000
Typical yearly saving	£101
Potential rating after completing steps 1 to 4	71 C

## Step 5: Solar water heating

Typical installation cost	£4,000 - £6,000
Typical yearly saving	£74
Potential rating after completing steps 1 to 5	74 C

## Step 6: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£3,500 - £5,500
---------------------------	-----------------

#### Potential rating after completing steps 1 to 6

85 B

#### Help paying for energy improvements

You might be able to get a grant from the Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

#### Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Lee King
Telephone	07984488721
Email	lee@epcsouthern.co.uk

#### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/024242
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

#### About this assessment

Assessor's declaration	No related party
Date of assessment	20 March 2024
Date of certificate	20 March 2024
Type of assessment	► RdSAP

# Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at <u>dluhc.digital-services@levellingup.gov.uk</u> or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).

Valid until	3 February 2030
Certificate number	0961-2888-6315-0021-4001 (/energy-certificate/0961-2888-6315-0021-4001)
Expired on	27 September 2019
