

HOME REPORT

ENERGY PERFORMANCE CERTIFICATE

DM HALL
CHARTERED SURVEYORS

Energy Performance Certificate (EPC)

Scotland

Dwellings

13 LADY HELEN STREET, KIRKCALDY, KY1 1PS

Dwelling type: Semi-detached house
Date of assessment: 15 February 2024
Date of certificate: 22 February 2024
Total floor area: 141 m²
Primary Energy Indicator: 299 kWh/m²/year

Reference number: 9155-1003-4202-3354-7200
Type of assessment: RdSAP, existing dwelling
Approved Organisation: Elmhurst
Main heating and fuel: Boiler and radiators, mains gas

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£8,862	See your recommendations report for more information
Over 3 years you could save*	£1,779	

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

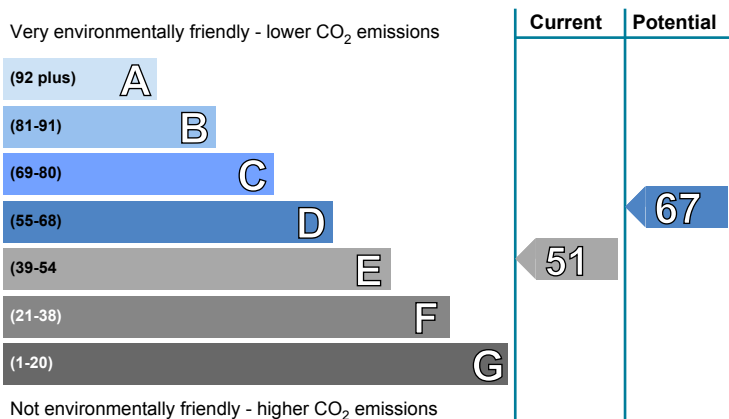

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (60)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (51)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Flat roof or sloping ceiling insulation	£850 - £1,500	£294.00
2 Internal or external wall insulation	£4,000 - £14,000	£951.00
3 Floor insulation (suspended floor)	£800 - £1,200	£537.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
	Solid brick, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
Roof	Pitched, 200 mm loft insulation	★★★★☆	★★★★☆
	Roof room(s), insulated	★★☆☆☆	★★☆☆☆
Floor	Suspended, no insulation (assumed)	—	—
	Solid, no insulation (assumed)	—	—
Windows	Fully double glazed	★★★★☆	★★★★☆
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	Room heaters, dual fuel (mineral and wood)	—	—
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Low energy lighting in all fixed outlets	★★★★★	★★★★★

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 54 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 7.6 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£7,767 over 3 years	£5,988 over 3 years	
Hot water	£627 over 3 years	£627 over 3 years	
Lighting	£468 over 3 years	£468 over 3 years	
Totals	£8,862	£7,083	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
			Energy	Environment
1 Flat roof or sloping ceiling insulation	£850 - £1,500	£98		
2 Internal or external wall insulation	£4,000 - £14,000	£317		
3 Floor insulation (suspended floor)	£800 - £1,200	£179		
4 Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£527		

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Flat roof or sloping ceiling insulation

Insulating a flat roof or sloping ceiling will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation can be placed on top of the roof under the waterproof membrane and should particularly be considered when the waterproofing needs to be replaced. Further information about roof insulation and details of local contractors can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

3 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

4 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit <https://energysavingtrust.org.uk/energy-at-home> for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	26,361	N/A	N/A	(3,386)
Water heating (kWh per year)	2,439			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Steven Buist
Assessor membership number: EES/009357
Company name/trading name: D M Hall Chartered Surveyors LLP
Address: 13 Wemyssfield
Kirkcaldy
KY1 1XN
Phone number: 0131 477 6000
Email address: dmhall@dmhall.co.uk
Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit [greener-scotland.org](https://www.greener-scotland.org) or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

SINGLE SURVEY

DM HALL
CHARTERED SURVEYORS

Single Survey

survey report on:

Property address	13 LADY HELEN STREET, KIRKCALDY, FIFE, KY1 1PS
-------------------------	---

Customer	ROSS AND KEIRA HERBERT
-----------------	------------------------

Customer address	13 LADY HELEN STREET, KIRKCALDY, FIFE, KY1 1PS
-------------------------	---

Prepared by	DM Hall
--------------------	---------

Date of inspection	15th February 2024
---------------------------	--------------------

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

Terms and Conditions

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.²

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

Terms and Conditions

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.1 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;

Terms and Conditions

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein*

Terms and Conditions

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" *is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	SEMI DETACHED COTTAGE STYLE VILLA with accommodation over the two floors and a single storey rear projection.
Accommodation	Ground Floor: Entrance vestibule, Hall, Living Room, Sitting/Dining Room, two Bedrooms, Kitchen and Shower Room. First/Attic Floor: Hall/Landing, Bedroom with office/dressing room off, Bathroom and Store.
Gross internal floor area (m²)	141 sq m or thereby.
Neighbourhood and location	The property forms part of an established residential area within central Kirkcaldy. The neighbouring properties are of a similar style/class of construction with a range of essential shop, school and public transport facilities being readily available nearby.
Age	1900 approx.
Weather	Rainy.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate. There is a brick built chimney stack at the party wall junction with the adjacent property with a further similar stack on the gable end elevation.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.

Roofing including roof space	<p>If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.</p> <p>Roof: The main roof is pitched and overlaid with renewed slates with the rear projection being similarly pitched/slate clad. There is also a full width slate clad dormer projection on the rear roof slope which has a flat covering overlaid with modern rubber material.</p> <p>Roof Space: Most of the roof space has been developed to form the upper floor accommodation. A store room cupboard allows access to the undeveloped front eaves which identifies timber trusses and timber sarking with insulation behind the plasterboarded wall finishes.</p>
Rainwater fittings	<p>Visually inspected with the aid of binoculars where appropriate.</p> <p>The front elevation supports a cast iron ogee style gutter connecting to a tubular downpipe. There are half round PVC gutters and tubular cast iron downpipes at the rear.</p>
Main walls	<p>Visually inspected with the aid of binoculars where appropriate.</p> <p>Foundations and concealed parts were not exposed or inspected.</p> <p>The main building is of solid sandstone wall construction being approx. 600mm thick having a pointed finish. The rear projection is mostly of rendered single brick construction albeit the rightmost elevation is formed in pointed stone-work.</p>
Windows, external doors and joinery	<p>Internal and external doors were opened and closed where keys were available.</p> <p>Random windows were opened and closed where possible.</p> <p>Doors and windows were not forced open.</p> <p>Windows: Replacement UPVC framed double glazed window units have been installed which are of a fixed casement style. There are also Velux windows on the roof slopes.</p> <p>External Doors: Front access is via a timber panel door with a UPVC panel/double glazed door to the rear.</p> <p>External Joinery: There are UPVC fascia features at the rear.</p>
External decorations	<p>Visually inspected.</p> <p>The cast iron rainwater fittings are black painted.</p>

Single Survey

Conservatories / porches	None.
Communal areas	Circulation areas visually inspected. A shared driveway at the side of the house provides access to the rear/garage.
Garages and permanent outbuildings	Visually inspected. There is a detached single car garage within the rear garden being of brick wall construction. Since my inspection the original cement asbestos roof has been renewed. This is now clad with modern anti-drip profile metal material. Vehicular access is via a metal up-and-over door.
Outside areas and boundaries	Visually inspected. The front garden is surfaced with decorated pebbles being bound by hedges. There is a shared block paved driveway adjacent to the side providing vehicular access to the rear. The rear garden is centrally turfed with concrete/paved paths and areas of pebbles/chips being bound/enclosed by stone walls.
Ceilings	Visually inspected from floor level. The ceilings are mostly of lath and plaster construction with some cornice features. The ceilings at attic floor level are plasterboarded.
Internal walls	Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate. The main walls have a plaster on the hard or lath and plaster finish. The walls/partitions at attic floor level and within the rear projection are plasterboarded.
Floors including sub floors	Floors: The floors are formed with suspended timber joists overlaid with floorboards or tongue and groove chipboard. The rear projection has a solid concrete floor. Sub-floors: No sub-floor inspection was carried out.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved. Kitchen units were visually inspected excluding appliances. The internal doors at ground floor level are of a timber panel style with modern solid oak doors upstairs. The kitchen has fitted base and wall units with cream laminate unit doors and compatible laminate worktops.

Single Survey

Chimney breasts and fireplaces	<p>Visually inspected.</p> <p>No testing of the flues or fittings was carried out.</p> <p>A multi fuel burning stove utilises the living room fireplace. All other former fireplace openings have been fully blocked over.</p>
Internal decorations	<p>Visually inspected.</p> <p>The property is decorated with painted finishes.</p>
Cellars	<p>There are no cellars.</p>
Electricity	<p>Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</p> <p>Mains supply installed. The electric meter and consumer unit are in a living room press cupboard.</p>
Gas	<p>Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</p> <p>Mains supply installed. The gas meter is in a press cupboard in the living/dining room.</p>
Water, plumbing, bathroom fittings	<p>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>Mains supply installed. The shower room has a modern albeit traditional style heritage white suite which has a thermostatic shower within the shower cubicle. A bathroom has also been added upstairs which a modern white suite with a further thermostatic shower provision. There is a composite sink unit with side drainer in the kitchen and visible pipework is in copper or PVC.</p>

Heating and hot water	<p>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>A gas fired central heating system is installed being provided by a Worcester Greenstar 30 Si combi boiler located in the attic/eaves. This serves a system of water filled radiators with thermostatic valves and also provides the domestic hot water.</p> <p>I would again refer to the multi fuel burning stove in the lounge.</p>
Drainage	<p>Drainage covers etc were not lifted.</p> <p>Neither drains nor drainage systems were tested.</p> <p>Drainage is via the main sewer.</p>
Fire, smoke and burglar alarms	<p>Visually inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>There is a smoke alarm provision.</p> <p>Legislation by the Scottish Government, which took effect from February 2022, requires all residential properties to have a system of inter-linked smoke alarms and heat detectors. Carbon monoxide detectors are also required where appropriate. Purchasers should appraise themselves of the requirements of this legislation, and engage with appropriately accredited contractors to ensure compliance.</p>
Any additional limits to inspection	<p>For flats / maisonettes</p> <p>Only the subject flat and internal communal areas giving access to the flat were inspected.</p> <p>If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.</p> <p>The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.</p> <p>At the date of inspection the property was occupied, fully furnished with floors covered throughout and the inspection was consequently restricted. No sub-floor inspection was carried out as I did not identify a hatch. The inspection of the roof space was limited to the eaves hatch area. I would also reaffirm that the services in the property have not been checked/tested. The garage roof has been replaced since my inspection with photographic evidence provided. This has not been re- inspected.</p> <p>Parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.</p>

<p>Any additional limits to inspection</p>	<p>I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation I have assumed that there is no Japanese Knotweed or other invasive plants within the boundaries of the property or in neighbouring properties.</p> <p>The report does not include an asbestos inspection. However asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor. Any such materials should not be drilled or disturbed without prior advice from a licensed specialist.</p> <p>Random testing for dampness was undertaken internally with the use of a moisture meter where accessible and considered appropriate.</p> <p>In accordance with Health and Safety guidelines I have not disturbed insulation, furniture or personal effects (particularly in cupboards). Floor coverings have not been moved.</p> <p>Personal effects in cupboards and fitted wardrobes were not moved and restricted my inspection.</p> <p>Concealed areas beneath and around bath/shower trays were not visible. Water spillage in these areas can often be discovered unexpectedly with resultant damage to concealed parts of the fabric.</p> <p>The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.</p> <p>Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is out with the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.</p>

Single Survey

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

 Structural movement	
Repair category	1
Notes	No obvious evidence of significant movement noted within the limitations of my inspection.

 Dampness, rot and infestation	
Repair category	1
Notes	No obvious evidence of significant dampness, rot or wood boring insect infestation

 Chimney stacks	
Repair category	1
Notes	No significant defects evident.

 Roofing including roof space	
Repair category	1
Notes	The roof has been fully re-slatted being free from obvious significant defects. Although a single slipped slate was noted on the rear roof slope which should be reinstated.

 Rainwater fittings	
Repair category	1
Notes	No significant defects evident. Cast iron conductors are prone to rust/corrosion and regular maintenance should be attended to.

Main walls

Repair category	1
Notes	No significant defects evident.

Windows, external doors and joinery

Repair category	2
Notes	At least two bay window units have condensation between the glass panes. Similarly the Velux windows are defective and future costs should be considered.

External decorations

Repair category	1
Notes	The cast iron rainwater fittings should be re-painted to prolong their useful life.

Conservatories/porches

Repair category	-
Notes	N/A

Communal areas

Repair category	-
Notes	N/A

Garages and permanent outbuildings

Repair category	2
Notes	There is weathering to the garage joinery timbers and vehicular door. There is also cracking to the concrete floor. Since my inspection the roof has been re-clad in modern material.

Outside areas and boundaries

Repair category	1
Notes	The garden areas are currently suitably attended to. Mortar pointing repairs are required to boundary stone walls at places.

Ceilings

Repair category	1
Notes	No significant defects evident.

Internal walls

Repair category	1
Notes	No significant defects evident.

Floors including sub-floors

Repair category	1
Notes	No significant defects evident.

Internal joinery and kitchen fittings

Repair category	1
Notes	No significant defects evident.

Chimney breasts and fireplaces

Repair category	1
Notes	No significant defects evident.

Internal decorations

Repair category	1
Notes	No significant defects evident.

Cellars

Repair category	-
Notes	N/A

Electricity

Repair category	1
Notes	<p>The fuse-box has been renewed with a modern style consumer unit. It is good practice to have the services checked by an appropriate contractor upon entry.</p> <p>It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC/SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IET regulations.</p>

Gas

Repair category	1
Notes	Trade bodies governing gas installations currently advise that gas appliances should be tested prior to change in occupancy and thereafter at least once a year by a Gas Safe registered contractor. It is assumed that gas appliances comply with relevant regulations.

Water, plumbing and bathroom fittings

Repair category	1
Notes	No significant defects evident.

Heating and hot water

Repair category	1
Notes	It is assumed that the heating and hot water systems have been properly serviced and maintained on a regular basis and installed in accordance with the relevant regulations.

Single Survey

Drainage

Repair category	1
Notes	There are no obvious blocked/choked drains on site.

Single Survey

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground Floor
2. Are there three steps or fewer to a main entrance door of the property?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
3. Is there a lift to the main entrance door of the property?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
4. Are all door openings greater than 750mm?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
5. Is there a toilet on the same level as the living room and kitchen?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
6. Is there a toilet on the same level as a bedroom?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
7. Are all rooms on the same level with no internal steps or stairs?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The property has been altered by the development of the roof space to form attic floor accommodation. It is understood that these works date to circa 1990. In recent times the attic floor has been further developed with a Dormer projection at the rear to form a office/dressing room and enlarged bathroom. Any documentation relating to past alterations should be retained with the Title Deeds.

It is assumed all necessary Local Authority and other consents have been obtained for alterations and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent then it is assumed they meet the standards required by the Building Regulations or are exempt.

There is a shared vehicular driveway providing access to the rear/garage. Access rights and maintenance liabilities may be verified from the Title Deeds.

Estimated reinstatement cost for insurance purposes

The current cost of reinstating the property would be fairly stated at £420,000 (FOUR HUNDRED AND TWENTY THOUSAND POUNDS).

It should be noted this sum is an estimate calculated by using a rate per square metre based on information provided by Building Cost Information Service (BCIS).

Valuation and market comments

Market Value: £265,000 (TWO HUNDRED AND SIXTY FIVE THOUSAND POUNDS).

Following buoyant market conditions over a prolonged period through the Covid 19 pandemic, there are now indications of a return to a more balanced level of supply and demand.

Mortgage Valuation Report

General Remarks

The property forms part of an established residential area of comparable type housing being convenient for local amenities. In general terms the building was found to be in a satisfactory state of repair having regard to age/type. There are some future maintenance consideration which have been reflected in the valuation.

The property has been altered by the development of a roof space to form attic floor accommodation. It is understood that these works date circa 1990. In recent times the attic floor has been further developed with a Dormer projection at the rear to form a office/dressing room and enlarged bathroom. Any documentation relating to past alterations should be retained with the Title Deeds.

It is assumed all necessary Local Authority and other consents have been obtained for alterations and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent then it is assumed they meet the standards required by the Building Regulations or are exempt.

There is a shared vehicular driveway providing access to the rear/garage. Access rights and maintenance liabilities may be verified from the Title Deeds.

Essential Repairs

None apparent.

Estimated cost of essential repairs £ Retention recommended? Yes No Amount £

Mortgage Valuation Report

Comment on Mortgageability

The property forms suitable security for mortgage purposes.

DM HALL
CHARTERED SURVEYORS

Property Questionnaire

Property address	13 LADY HELEN STREET, KIRKCALDY, KY1 1PS
Seller(s)	KEIRA & ROSS HERBERT
Completion date of property questionnaire	09/02/2024

Property Questionnaire

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership	
	How long have you owned the property?	2 years 7 months
2.	Council tax	
	Which Council Tax band is your property in? (Please circle)	
	A B C D E F G H	
3.	Parking	
	<p>What are the arrangements for parking at your property?</p> <p>(Please tick all that apply)</p> <ul style="list-style-type: none"> • Garage <input checked="" type="checkbox"/> • Allocated parking space <input type="checkbox"/> • Driveway <input checked="" type="checkbox"/> • Shared parking <input type="checkbox"/> • On street <input checked="" type="checkbox"/> • Resident permit <input type="checkbox"/> • Metered parking <input type="checkbox"/> • Other (please specify): <input style="width: 400px;" type="text"/> 	
4.	Conservation area	
	<p>Is your property in a designated Conservation Area (i.e. an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?</p>	<p>Yes / No / Don't know</p>

Property Questionnaire

5.	Listed buildings	
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	Yes / No
6.	Alterations/additions/extensions	
a.	<p>(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?</p> <p>If you have answered yes, please describe below the changes which you have made:</p> <p>Addition of rear dormer extension to form additional family bathroom and office/walk-in wardrobe</p>	Yes / No
	<p>(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?</p> <p>If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.</p> <p>If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:</p>	Yes / No
b.	<p>Have you had replacement windows, doors, patio doors or double glazing installed in your property?</p> <p>If you have answered yes, please answer the three questions below:</p>	Yes / No
	(i) Were the replacements the same shape and type as the ones you replaced?	Yes / No
	(ii) Did this work involve any changes to the window or door openings?	Yes / No
	<p>(iii) Please describe the changes made to the windows, doors or patio doors (with approximate dates when the work was completed):</p> <p>Please give any guarantees which you received for this work to your solicitor or estate agent.</p>	

Property Questionnaire

7. Central heating		
a.	<p>Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).</p> <p>If you have answered yes / partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).</p> <p>Gas Fired</p> <p>If you have answered yes, please answer the three questions below:</p>	Yes / No / Partial
b.	When was your central heating system or partial central heating system installed?	Dont Know
c.	<p>Do you have a maintenance contract for the central heating system?</p> <p>If you have answered yes, please give details of the company with which you have a maintenance contract:</p>	Yes / No
d.	When was your maintenance agreement last renewed? (Please provide the month and year).	
8. Energy Performance Certificate		
	Does your property have an Energy Performance Certificate which is less than 10 years old?	Yes / No
9. Issues that may have affected your property		
a.	<p>Has there been any storm, flood, fire or other structural damage to your property while you have owned it?</p> <p>If you have answered yes, is the damage the subject of any outstanding insurance claim?</p>	<p>Yes / No</p> <p>Yes / No</p>
b.	<p>Are you aware of the existence of asbestos in your property?</p> <p>If you have answered yes, please give details:</p>	Yes / No

Property Questionnaire

10. Services																									
a.	<p>Please tick which services are connected to your property and give details of the supplier:</p> <table border="1"> <thead> <tr> <th>Services</th> <th>Connected</th> <th>Supplier</th> </tr> </thead> <tbody> <tr> <td>Gas / liquid petroleum gas</td> <td>✓</td> <td>Octopus</td> </tr> <tr> <td>Water mains / private water supply</td> <td>✓</td> <td>Fife Council</td> </tr> <tr> <td>Electricity</td> <td>✓</td> <td>Octopus</td> </tr> <tr> <td>Mains drainage</td> <td>✓</td> <td>Fife Council</td> </tr> <tr> <td>Telephone</td> <td>✓</td> <td>Virgin Media</td> </tr> <tr> <td>Cable TV / satellite</td> <td>—</td> <td></td> </tr> <tr> <td>Broadband</td> <td>✓</td> <td>Virgin Media</td> </tr> </tbody> </table>	Services	Connected	Supplier	Gas / liquid petroleum gas	✓	Octopus	Water mains / private water supply	✓	Fife Council	Electricity	✓	Octopus	Mains drainage	✓	Fife Council	Telephone	✓	Virgin Media	Cable TV / satellite	—		Broadband	✓	Virgin Media
