LUXURY ECO LIVING

CHENEY CLOSE

LUXURY ECO LIVING

A stunning development of 6 new-build, energy-efficient eco-homes set within the Cheshire village of Willaston.

An ideal location for discerning home-buyers looking for a unique property in a rural location yet close to all local amenities.

Cheney Close offers high specification, luxury living for those looking to embrace a more sustainable and energy efficient lifestyle.

Welcome to Cherish Homes.

OUR ECO HOMES PROVIDE MORE THAN JUST A BEAUTIFUL EXTERIOR

With the consistent rise in energy costs and a drive towards greater environmental sustainability, increasing numbers of home buyers are looking toward more energy efficient homes that offer substantially lower

energy consumption without compromising on the design and functionality of their perfect house. At Cheney Close you get just that with super high energy performance houses that provide superb thermal insulation,

energy-saving external doors, triple-glazed windows, air source heat pump and mechanical ventilation with heat recovery all as standard.

CHENEY CLOSE LOCATION

Cheney Close is a private cul-de-sac development in the much sought after Cheshire village of Willaston.

Nestled in between Nantwich & Crewe, the area is becoming an increasingly popular commuter location due to the fantastic transport connections to via both road & train, providing access to all the UK's major cities as well as North and mid Wales (30 mins).

The development is situated off the A500, two miles east of the historic town of Nantwich. The M6 motorway is accessible from junction 16 and Crewe railway station at only 3 miles away serves all the major cities including Manchester (37 mins), Liverpool (48 mins) Birmingham (55 mins) and London Euston (just 1hr 36mins!).

WILLASTON NEAR NANTWICH, CHESHIRE COMMANDS A PRIVATE AND BEAUTIFUL LOCATION FOR THIS SMALL DEVELOPMENT OF HOUSES PERFECT FOR INDIVIDUALS OR FAMILIES.

The Cheney Close development resides in a beautiful and quiet area where local residents clearly care for the appearance and condition of their homes as well as their surroundings.

Willaston itself is one of Cheshire's best kept villages with a vibrant community of approximately 1,500 households and 3,000 people. It boasts an excellent primary school along with a village shop, two great pubs (The Lamb and The Nag's Head), a social club and an exceptional sports club with local football, Rugby, Squash, Hockey, cricket, running teams.

WHY CHOOSE A CHERISH HOME?

For many years now, new housing in the UK has been delivered almost exclusively by large, national and regional housebuilders. However, this has several major drawbacks - not least poor-quality build specification and little consideration given to the long-term cost of energy or you, the home buyer.

Quality

Cherish Homes are built to a much higher specification and quality than compared to typical UK built homes. Designed & constructed to German 'Passive Haus - Fabric First' principles, a Cherish built home far exceeds UK Building Regulations.

Energy Efficient

All Cherish Homes are triple glazed, highly insulated and utilise an Air-Source Heat Pump and a Mechanical Heat Recovery Ventilation Systems to achieve a minimum 'B' Rating EPC Certificate, providing a significant saving on your energy bills today and for the future.

Guarantee

All Cherish Homes Come with a 10-year UK New Build Warranty, along with an additional 20-year manufacturer warranty... twice as long as typical UK built homes and a clear sign of Cherish Homes long term commitment to quality.

SPECIFICATION - FABRIC FIRST

The Passivhaus 'Fabric First' principles to which Cherish Homes adhere are intended to minimise the amount of heat a home loses, therefore minimising the amount of energy required to heat the home even before considering the installation of heating systems. The high standard of energy efficiency is due to the exceptional airtightness of the house's structure ensuring that heat is kept inside the house.

Heat loss is minimised thanks to 30cm of thermal insulation which 'wraps the house' to achieve a coefficient value of $U=0,118 \text{ W}/(\text{m}^2\text{K})$... Providing an insulating envelope which protects against both cold and overheating.

Energy-efficient Triple Glazed, 6 chamber windows and thermally protected frames achieve $U=0,6 \text{ W}/(\text{m}^2\text{K})$... Triple-glazed windows also provide excellent soundproofing.

All Cherish Home feature Passivhaus-certified Zehnder MVHR COMFOAIR Q Mechanical Ventilation with

a Heat Recovery system.

This is extremely important in energy-efficient houses, as the continuous exchange of air provides a comfortable and pleasant atmosphere in the home at all times.

The ventilation system includes a recuperator that retains up to 80% of heat in the expelled air, which also helps to reduce heating bills.

No matter what style or size of Cherish Home you choose to live in, all provide energy efficient living using only 40-70kWh/m² per year.

NO MATTER WHAT STYLE OR SIZE OF CHERISH HOME YOU CHOOSE TO LIVE IN, ALL PROVIDE ENERGY-EFFICIENT LIVING USING ONLY 40-70 KWH/² PER YEAR.

SPECIFICATION – HEATING

Incorporating heat pump technology into your home is one of the most economical, effective, and environmentally friendly ways to cover your heating and hot water needs. Air-Source Heat Pumps operate using electricity and produce no emissions, making them much more environmentally friendly than traditional heating systems.

The main advantage of an Air-Source Heat Pump is they safeguard homeowners against fluctuating energy prices.

As the main source of heat generation comes from the environment itself, the amount of energy required to generate the necessary heating for your home is vastly reduced compared to other methods. Approximately 75% of the energy required is generated from the outside air, with only 25% being required from electricity. This means that 75% of the energy you use will be from a renewable source, which will reduce your emissions and CO2 impact.

The Vaillant aroTHERM plus combines heating and hot water in a single solution. Equipped with the latest heat pump technology, it has been accredited with the Quiet Mark & Green Home Award 2021.

The natural refrigerant used enables above average performance; at the same time, it has a particularly low global warming potential, which makes aroTHERM plus extremely eco-friendly.

Designed for a peaceful home, the aroTHERM plus system has very low sound emissions, it's very quiet in operation, being no louder than a domestic fridge.

SPECIFICATION – MATERIAL FINISHES

Heating System & Heat Distribution
